DME MAC Jurisdiction C News from CGS

News from CGS

Mass Adjustments Scheduled for Extension of the Transition to the Fully Adjusted Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) Payment Rates Under Section 16007 of the 21st Century Cures Act – CMS has issued [MM9968](#) and related contractor instructions to begin mass adjustments for all claims impacted by the extension of the transition to the fully adjusted Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) payment rates under Section 16007 of the 21st Century Cures Act.

CGS is prepared to begin mass adjustments to all claims covered under the rule. CGS Jurisdiction C will begin adjusting approximately 40,000 claims each day for approximately 24 weeks. CGS Jurisdiction B will begin adjusting approximately 20,000 claims each day for approximately 24 weeks. We have prepared a summary of CR9968 and MM9968 which provides suppliers with details on the mass adjustment process. Suppliers are strongly encouraged to read [MM9968](#) to fully understand why the adjustments are occurring and what supplier actions may be necessary regarding retroactive use of the KE modifier ***once the mass adjustments are complete.***

CGS has also produced an informational video on the mass adjustment process. The video is available under the Education menu at <https://www.cgsmedicare.com/jc> and on our [YouTube channel](#).
